

Network wide training/workshops plan 2022

Training event	Details
1a Summer School 1 Study design, data handling & phageomics	Summer School 1 and Workshop 1-Data handling and phageomics.
1b to provide information on IP management, patenting, spinout companies and commercialisation	Workshop 1- IP Management and Innovation
2. Research Webinars Purpose: To provide ongoing interaction between ESRs to ensure sharing of data and techniques and to maintain compatibility of datasets Attendees: 8 ESRs & Supervisors	Research Webinars
3. Conferences	Conference Rowett-INRA 2022 Joint Conference
4a and 4b. To provide hands on training in metabolomics platforms in common use, data handling and technical approaches. To provide hands-on training in big data analytics and data integration approaches (including machine learning and integration of multi-omics datasets)	Workshop 2 & 3: Big data handling and data integration. Training in metabolomics platforms. Big data analytics, data integration (machine learning, and integration of multi-omics datasets).
4c First-hand experience of relevant industry sector for ESRs	Site visit to industry partner Pinta Luba
5. Conference	FEMS Congress 2023
